PREFACE

The Bureau of Economic and Business Research presents the eighth edition of the *Statistical Abstract of Utah, 1979.*

The basic goal of this document is to bring together in a readily available format, the data most often requested. During an average year, hundreds of calls and personal visits are made to the Bureau by government agencies, business firms, households, and other organizations, for help in locating and interpreting data on a wide range of subjects and problems relating to the Utah economy. Beginning in 1947 with the first edition of the *Statistical Abstract of Utah,* the Bureau staff has tried to incorporate in succeeding editions of the publication, the data elements which the users have found most valuable.

The *Statistical Abstract* has been greatly enlarged over the eight editions, and the improved quality and quantity of data available reflect the increasingly complex demands of our society. The preparation of the tables is a sizable undertaking involving a large number of staff members. Mickee Roll, research assistant, has carried the major burden for the completion of this project, researching much of the updated information. Every table was checked and rechecked for its accuracy and completeness. In addition to supervising the preparation of the data included in the *Statistical Abstract,* Ms. Roll has reviewed similar publications of other states and federal agencies.

Many of the sections were updated by Mark Linford, and other researchers assisting in the data collection were Ronda Brinkerhoff, Diane Gillam, Randall Rodgers and Jeff Coles. Editorial and production were under the direction of Mari Lou Wood, assisted by graphic arts director, James Peters; printing by Nolan Nelson.

The Bureau is indebted to a large number of agencies and organizations for assistance: Utah Department of Employment Security, Bureau of Health Statistics, Utah Foundation, State Board of Education, Office of the Commissioner of Higher Education, Division of Family Services, Office of the Secretary of State, Department of Natural Resources, Public Service Commission and the State Department of Highways. To each of these agencies, we owe our sincere thanks and appreciation for their help and cooperation.

In addition, we must express our continued appreciation to the Industrial Development Division of the Utah Department of Development Services for financial assistance in helping to defray the costs of publishing this book.

Suggestions from users of the *Statistical Abstract of Utah, 1979* will be appreciated so that future editions can be further improved.

[a] In 1950, the Bureau of the Census adopted the concept of the urbanized area and delineated boundaries for unincorporated places, making possible the recognition of territory as urban, irrespective of its corporate status. All the population residing in urban fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition.

Note: These figures are one of a set of economic and demographic projections referred to as the Alternative Futures, each of which represents different possibilities of future developments. This particular set represents the population projections taken from Alternative Future Zero, which is specified as the projected set of basic employment events viewed as most likely to occur during the projection period along with total employment and demographic impacts projected to result from these events.

[a] Workers counted more than once if involved in more than one stoppage during year.

[b] Estimated working time computed by multiplying average number of employed workers by number of days worked by most employees. In 1967, total employed workers was redefined. Idleness computed on this basis is lower than the former series.

[a] Total is not equal to sum of categories.

[b] Individual categories add to more than the total because some persons were receiving assistance under more than one program.

[c] Persons receiving money payments under Old-Age Assistance, Aid to Blind and Aid to Disabled were transferred to program administered by the Federal Social Security Office on January 1, 1974.

[d] Medical Assistance is distributed to other categories.

[a] Full time equivalent is a computed statistic representing the number of full time employees that could have been employed if all personnel were engaged on a full time basis at the average monthly pay applying to full time workers. It is calculated, for a particular function of a government, by dividing the average monthly pay for full time employees of that function into the total pay for all full and part time employees in the function.

[a] A number of changes in the definition of manufacturing industries has occurred over the years. The changes in procedure, however, have not appreciably affected the comparability of the historical data except for the figures on the number of establishments.

[a] Work week ended nearest November 15 for years 1929-1967; work week including March 12 for 1972.

[b] The retail trade data for 1929, 1939 and the "Payroll" and "Paid Employees" data for 1948 are not strictly comparable with later data due to a change in classification. The change excludes "milk dealers" and all establishments with no paid employment which had a sales volume of less than $2,500 for the particular year. The 1948 and earlier censuses included "milk dealers" and establishments which operated the entire year with a sales volume of $500 or more. Other minor changes were also involved. (See Census of Business, 1954, *Retail Trade*).

[c] Unincorporated businesses only.

[a] Prior to 1970 figures are for plate year. Beginning with 1970 figures are for registrations during calendar year.

[b] Not comparable with earlier years because beginning with 1965 annual registration not required for exempt state and local vehicles. Exempt plates were reissued in 1969.

[c] In 1975, due to computer malfunctioning, approximately 50,000 registrations are not included.

State gasoline tax rates:

March 1923 March 1925:	2½¢ per gallon	July 1951 May 1957:	5¢ per gallon
April 1925 May 1931:	3½¢ per gallon	May 1957-June 1969:	6¢ per gallon
May 1931 June 1951	4¢ per gallon	July 1969 June 1978:	7¢ per gallon
		July 1978 present:	9¢ per gallon

[a] Does not include aviation gasoline, diesel and other special fuels.

[b] Excludes federal gasoline tax collections.

[c] Tax figures are not strictly comparable to sales figures as there is a time lag in tax collections.

[a] Pastureland included in improved land for 1945 must have been plowed within seven years. Figures for other years include land pastured which could have been plowed, but may not have been, seven years prior to the census. The figure for 1945 is therefore not strictly comparable with other censuses.

[b] Prior to 1974, the definition of a farm was based primarily on a combination of number of acres and value of agricultural products sold. In 1974 a farm was defined to include all land on which agricultural operations were conducted and from which $1,000 or more of agricultural products were sold. Thus, 1974 figures are not strictly comparable with those of other censuses.

[a] The United States figures from 1925 1974 are a revised series and are not strictly comparable with data prior to 1925 The revised series represents value of domestic primary products only and excludes products made from scrap and mineral products made from material of foreign origin which are included in the 1905 1924 data.

[b] Figure excludes uranium; value of uranium for 1955 was not released by the Atomic Energy Commission.
